

How to take Care of your New Breeches

Freedom Breeches Care... Keep you looking your best.

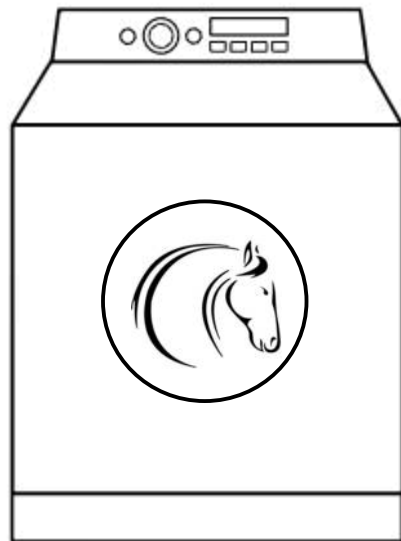

Your Breeches are made from high-tech combinations of fabrics; such as bamboo, lycra and nylon. The stretch, breathability and performance of these fabrics makes them sensitive to heat - therefore hot water & tumble drying can weaken and distort the fabric. Silicon seats are also sensitive to heat due to being bonded with the fabric at high temperatures.

Washing Instructions

- COLD machine wash.
- Remove from washing machine as soon as possible.
- DO NOT tumble dry.
- Spot-treat stains with a stain treatment, then wash as usual.

For White Breeches...

- DO NOT soak in bleach or stain removers with bleach content
- Wash as you would with other jodds.
- If a stain doesn't come out, add some detergent directly onto the stain & wash again.
- DO NOT soak longer than an hour as it destroys the fabric and rusts the zips.

Please take the time to read these instructions carefully as we are unable to refund or replace mistreated garments.
